Week 44/2023 (31 Oct – 05 Nov)

Comment: Australian Coal Exports

AUSTRALIAN COAL EXPORTS

Global coal trade has really picked up pace in recent months, and is now fully back to pre-Covid levels.

In Jan-Sep 2023, total global seaborne coal loadings increased by +5.5% y-o-y to 991.7 mln t (excluding cabotage), based on vessel tracking data from AXS Marine.

This was well above the 939.6 mln t loaded in Jan-Sep 2022, the 947.1 mln t in Jan-Sep 2021, and the 881.8 mln t in Jan-Sep 2020.

It was also a little above the 974.9 mln t loaded in Jan-Sep 2019.

In Jan-Sep 2023, exports from Indonesia increased by +9.8% y-o-y to 361.2 mln t, whilst from Australia were up +3.3% y-o-y to 254.2 mln t.

From Russia exports increased by +3.0% y-o-y to 143.4 mln t in Jan-Sep 2023, from the USA increased by +13.6% y-o-y to 63.6 mln t, and from South Africa decline -2.6% y-o-y to 44.7 mln t.

Shipments from Mozambique surged by +21.7% t-o-y in Jan-Sep 2023 to a record 17.7 mln t.

Seaborne coal imports into Mainland China jumped by +60.6% y-o-y to 269.5 mln t in Jan-Sep 2023, whilst imports to India declined by -2.8% y-o-y to 171.0 mln t.

Imports to Japan declined by -9.4% y-o-y to 121.4 mln t in Jan-Sep 2023, to South Korea by -4.7% y-o-y to 88.8 mln t, to the EU -25.4% y-o-y to 70.4 mln t, to Vietnam increased by +48.3% y-o-y to 36.0 mln t.

Australia is the second largest exporter of coal worldwide, with 25.6% of global seaborne coal exports in Jan-Sep 2023, quite far behind Indonesia which had a 36.4% share in Jan-Sep 2023.

Coal shipments from Australia have drastically affected in recent years by the country being backlisted by Mainland China, previously Australia's largest customer.

That said, Australian exporters have been relatively successful in finding new markets limiting the impact on overall volumes.

In 2020, Australian coal exports fell sharply by -7.1% y-o-y to 361.2 mln t, from 388.9 mln tonnes in 2019, based on AXS Marine data.

In 2021, volumes out of Australia remained essentially flat at 356.9 mln t, or -1.2% y-o-y.

In the 12 months of 2022, shipments from Australia declined further by -7.8% y-o-y to 329.1 mln tonnes.

The main coal export terminals in Australia are Newcastle (77.7 mln tonnes loaded in Jan-Sep 2023), Gladstone (49.7 mln t), Dalrymple Bay (44.9 mln t), Hay Point (29.1 mln t), Abbot Point (24.3 mln t), Port Kembla (4.8 mln t), Brisbane (1.7 mln t), Whyalla (0.2 mln t).

The majority (56%) of coal volumes shipped from Australia in Jan-Sep 2023 were loaded on Panamax or Post-Panamax tonnage, with 41% of volumes shipped on Capesize

vessels, and 3% on Handy or Supra tonnage.

There have been quite remarkable reshuffles in terms of trade patterns over the last few years, driven by political considerations.

Coal exports from Australia to Mainland China declined by -99.3% y-o-y in Jan-Dec 2021, to just 0.5 mln tonnes, from 66.6 mln t in 2020.

In Jan-Sep 2023, shipments from Australia to China surged back as relations normalized, to 38.7 mln tonnes, from 0.2 mln t in Jan-Sep 2022, but still below the 64.6 mln t of Jan-Sep 2020.

Pretty much the opposite happened to India. In 2021, Australia exported 70.1 mln t of coal to India, up +35.8% y-o-y, from 51.6 mln in 2020.

In 2022, however, shipments from Australia to India slowed down by -21.6% y-o-y to 54.9 mln tonnes, due to a greater availability of Indonesian coal.

In Jan-Sep 2023, Australia exported 37.7 mln t of coal to India, down -9.2% y-o-y from 41.5 mln t in Jan-Sep 2022.

The top destination however is still Japan, with 76.1 mln tonnes in Jan-Sep 2023, down -14.7% y-o-y, but still accounting for 29.9% of Australian coal exports.

China now accounts for 15.2% of Australia's coal exports, with India 14.8%, Korea 9.5%, Taiwan 9.0%, Vietnam 5.9%, and the EU at 5.4%.

CAPE-SIZE MARKET

ATLANTIC AND PACIFIC BASIN

It was a challenging week for Capesizes with a modest increase in trading volumes at the end which represented a positive shift in the market.

Iron ore prices rose for a second consecutive week, as a result of the stimulus-related optimism and supportive fundamentals in China which might give some strength to the segment of larger vessels.

In the Pacific, Rio Tinto fixed three TBN vessels to load their cargoes of 170,000mt +/- 10% iron ore from Dampier to Qingdao, laydays 15/17 November, 17/19 November and 18/20 November, respectively at freight rates of \$8.15/mt, \$8.00/mt and \$8.50/mt.

BHP fixed a TBN Newcastlemax to lift their stem of 185,000mt +/- 10% iron ore from Port Hedland to Qingdao, laydays 17/19 November at \$7.80/mt and another TBN vessel to lift their stem of 160,000mt +/- 10% iron ore from Port Hedland to Qingdao, laydays 18/20 November

at \$ 8.40/mt.

Welhunt fixed a TBN vessel to lift the stem of 130,000mt +/- 10% coal from Newcastle to Xiamen, laydays 20/30 November at \$12.10/mt.

Vale fixed the MV Angel II (175191 dwt | 2012 built) and the MV Ocean Emperor (182143 dwt | 2010 built) to load their cargoes of 170,000mt +/- 10% iron ore from TRMT to Qingdao, laydays 10/13 November and 13/15 November, respectively at \$6.60/mt and \$6.00/mt.

Richland fixed the MV AC Pioneer (171681 dwt | 2004 built, scrubber-fitted) basis delivery CJK on 10 November for a trip via East Coast Australia to China at \$16,000/d.

In the Atlantic basin, CSE fixed a TBN vessel to load 190,000mt +/- 10% iron ore from Seven Islands to Taiwan, laydays 21/25 November, at a freight rate sub \$25.00/mt.

Erdemir fixed a TBN vessel to load their cargo of 150,000mt +/- 10% iron ore from Narvik to Erdermir,

laydays 15/24 November at \$13.90/mt.

Cargill fixed a Costamare TBN to lift a stem of 160,000mt +/- 10% from Narvik to Qingdao, laydays 15/21 November at \$26.50/mt.

Costamare also fixed the MV Frontier Unity (181415 dwt | 2012 built) to load a cargo of 160,000mt +/- 10% coal from Bolivar to Zhoushan, laydays 14/23 November at \$29.00/mt.

Flame fixed the MV Maran Grace (180391 dwt | 2010 built) to load a stem of 160,000mt +/- 10% coal from Puerto Drummond to Taean, laydays 5/15 December at \$26.00/mt.

From South Africa, Assmang Ore & Metals fixed the MV Maria D (179000 dwt | 2016 built) to load a cargo of 170,000mt +/- 10% iron ore from Saldanha Bay to Qingdao, laydays 17/21 November at \$14.65/mt.

PANAMAX MARKET

ATLANTIC BASIN

N/A

PACIFIC BASIN

The market softened during the week. P5 closed on Monday at \$12,728/d to \$11,831/d at the end of the week.

An 81,000 dwt built 2021 was reported fixed for a NoPac RV around \$10,500/d at the beginning of the

week.

Another very modern 82,500 dwt open Port Kelang very early Nov was fixed around \$16,000/d for a trip to WC Australia and a 2013 built Panamax achieved high \$9,000s/d basis dely Taichung 11/16 Nov for a

TCT via Indo to S China.

At the end of the week a 73,300 dwt built 1998 open Wenzhou 8 Nov achieved \$7,000/d for a E Kalimantan to S China.

SUPRAMAX & HANDYSIZE MARKET

US GULF / NORTH AMERICA

Strong activity and a short tonnage list contributed to keep rates at the high level of the previous week.

A nice Ultramax was fixed at \$28,000/d with grains to Spore and a similar unit achieved \$32,750/d with petcoke to India.

A 58,000 dwt was fixed at \$21,000/d with grains to Morocco and an Ultramax achieved \$21,500/d with coal to E Med.

Handies kept the positive trend as well with TAs fixed around \$17,000/d basis 38,000 dwt.

EAST COAST SOUTH AMERICA

Active market both on Handy and Supramax, but rates were lower compared to other areas in the Atlantic basin, especially USG.

A nice 38,000 dwt built 2012 was rumored at \$15,000/d basis dely aps

Santos for a trip with agriproducts to Morocco.

A modern 36,000 dwt was fixed at \$16,000 + 80,000 gbb basis dely aps ECSAm for a tct with calcined petcoke to S Africa.

A 63,000 dwt was rumored fixed at \$14,500/d + 450,000 gbb basis dely aps ECSAm for a tct to MEG/Bangladesh, intention Chittagong.

NORTH EUROPE / CONTINENT

Cont was still tight and rates still in the region of \$20,000/d for trips to Med on Supramax.

Russian e xports from the Baltic is still very high with smx umx getting fxd

for baltic fh at very high \$30k's or very low \$40k's bss del baltic.

BLACK SEA / MEDITERRANEAN

Another week with declining rates.

Cargoes originating in Russia and Ukraine also flatlined to levels close to normal voyages in the area.

The tonnage list is not large, but the number of spot cargoes is certainly smaller.

The trend for the rest of the year seems to be in this direction if we consider that the cargoes for December dates were quickly fixed at

the levels that charterers were bidding.

On Handies CrossMed was fixed at \$10,000/d basis dely passing Canakkale.

Owners were asking around \$11/12,000/d, but some vessels were reported at \$9,000/d for trips to Continent or CrossMed.

Supramax tonnage was fixing around \$12,000/d.

On TA, Handies were fixed to USG at \$11,000/d and at \$9,000/d to ECSAm. Supramaxes were fixing around \$13,000/d to USG.

The trip East decreased as well with Supramaxes fixing around \$19,000/d basis dely Canakkale while Handies were getting \$14/15,000/d.

SUPRAMAX & HANDYSIZE MARKET

SOUTH AFRICA / INDIAN OCEAN

During the week rates in the whole area kept coming off.

From MEG, a 57,000 dwt was fixed aps loadport at \$13,000/d for a trip to ECI with fertilizer.

Another similar Dolphin57 was fixed for a trip to SE Asia with fertilizers at \$12,500/d basis dely aps loadport in MEG.

A 63,000 dwt was fixed around \$17,000/d basis dely UAE port for a trip to Bangladesh with aggregates in bulk.

The market remained soft from ECI with a 57,000 dwt fixing early in the week around \$7,200/d for a trip to China with iron ore in bulk.

Towards the end of the week a similar unit was fixed around

\$6,500/d for the same trip.

Rates also came off from S Africa with 63,000 dwt tonnage fixing around \$15,500/16,000/d basis aps S Africa + 155/160,000 gbb to F East.

A 56,000 dwt was rumored in the region of \$14,500/d + 145,000 gbb to F East.

FAR EAST / PACIFIC

The market trend remained negative and rates on the most representative routes showed a decrease of more than \$1,000/d on Supramax tonnage and a bit less on Handies.

A 63,000 dwt with dely Indonesia was reported at \$13,000/d for a trip via Indonesia to China, a 56,000 dwt

with dely Philippines achieved \$9,000/d for a trip via Indonesia to Thailand and a 58,000 dwt with dely mid-China was done at \$8,500/d for a trip via Indonesia to SE Asia.

A 63,000 dwt with dely Indonesia was fixed at \$15,000/d for a trip to EC India and a 63,000 dwt with dely

Indonesia took the same rate for a trip to Bangladesh.

On Handies, a 29,000 dwt with dely Malaysia was done at \$9,000/d for a trip to Australia with clinker.

CRUDE TANKER MARKET

VLCC rates peaked on Wednesday and settled around WS72 for 270,000 mt MEG-China and WS73 level for 260,000 mt W Afr-China.

The Suezmax sentiment weakened a bit in the second half of the week, with Petrogal agreeing WS162.5 for a replacement ex Angola to UKCM 17/11 and Exxon fixing/faling at WS157.5 for a cargo ex Congo on the same dates.

In Med a Libya-China was fixed at \$5.85 mln. 145,000 mt from USG to Europe paid up to WS142.5.

From Basrah only Chevron was fixing 140,000 mt to UKCM off 15/11 at WS90.

Rates for MEG-F East remained steady around WS130 level.

Aframax rates in Med kept rising with 80,000 mt Ceyhan-Med assessed around WS260 and most cargoes covered up to mid Nov dates.

In NW Europe the market eased to WS200 level for local voyages.

Rates for WTI cargoes ex USG to Europe softened to/below 70@260.

East of Suez, rates kept their upward trajectory to WS192.5 level for MEG-F East.

Still 4 (vs 4) VLCC and down to 1 (vs 3) Suezmax waiting off China laden for more than 2 weeks.

Delays at Turkish straits up to abt 7.0 days n/b and abt 5.0 days s/b.

PRODUCT TANKER MARKET

CLEAN

Dropping rates for LR2 due to a lack of enquiries, especially ex MEG. On Friday a 75,000 mt cargo ex MEG to UKC was fixed at \$3.9 mln (a decrease of \$0.5 mln compared to the previous week), Far East destinations were 75@145.

A softer week also for LR1 units with MEG-F East 55@155 and MEG-UKC around \$3.2 mln.

Handies in Med remained soft at WS190/195.

MRs in Med increased by 10 WS points thanks to a bullish market in Cont. One of the last fixtures on Med TA was 37@175.

As said a very good week for MRs in Cont with TC2 fixing WS200 on the back of constant demand and a very

short tonnage list. The bad weather in Cont and in Med slowed some ballasters and could provide support for the coming week.

Handies on CrossUKC were done 30@165.

A fairly steady trend ex Russia with lot of cargoes worked P&C. Both in BSea and in Baltic the number of clean cargoes appears to be slightly less than in the past. 30@270 ex Baltic and 30@265 ex BSea to Med destinations.

DIRTY

A very short position list in Med, bad weather and uncertainty allowed owners to push levels higher to 30@310 for CrossMed and 30@360 for Russian BSea-Med. MRs were

fixing both for full and part cargoes at levels around 45@235 for CrossMed and 45@290 from Russian BSea.

The Handy market in N Europe was still at good levels with CrossUKC traded at 30@305. Russian Baltic to Med was around 30@350.

Activity on full stem MR cargoes were difficult to spot, however a short tonnage list helped to keep rates high at 45@225 for CrossUKC and 45@270 for Russian Baltic to Med.

No activity seen for the Panamax in Europe, with the last test on Med TA 55@130.

CONTAINERSHIP MARKET

Also this week, export demand in Asia for North America and Europe was weak, which was reflected in the chartering market.

The major operators (One, Hapag Lloyd, Yang Ming etc) announced further suspensions of liner services for these routes.

The hire rates for the various

sizes/periods continue to fall and still seems to be no sign of stability.

The Suez Canal Authority (SCA) announced increase fees on northbound transits by 15% on containers vessels as from 15th January 2024.

The new fees will not apply to eastbound vessels whose last stops

were at the ports of Algericas, Tangiers or any other port west of the Straits of Gibraltar and heading directly to Far Eastern ports.

The same hikes also apply to all other types of vessel except ro-ro ships, which will be subject to a 5% increase.

NEWBUILDING ORDERS

In a week dominated by tanker orders, the only remarkable order in dry segment comes from Eastern Pacific, which added 3 x 210,000 dwt NewCastlemax at Qingdao Beihai.

This order brings the total number of vessels ordered by the Singapore based owner at the Chinese yard to 6.

All the vessels will be dual fuel ammonia propelled and priced \$80 mln each, with the latest trio to be delivered in 2027.

Dynacom has chosen Yangzijiang to build 2 x LR1 tankers at a price of \$53 mln each, deliveries expected in June and December 2026.

Vessels will fit engines that will burn

conventional marine fuel.

Navios Maritime officially confirmed orders for 4 x LR2 at a price of \$64.55 mln each.

An additional \$3.3 mln per ship has been allocated for potential fuel enhancements.

All deliveries are scheduled to take place within 2026.

The identity of the builder remains undisclosed so far.

Hayfin Capital invested \$85.5 mln for each of the two Suezmax it ordered at Hyundai + the option to acquire 2 more.

These vessels are expected to be delivered by Hyundai in 2026.

A preliminary agreement seems to have been reached between Maersk and Hyundai Samho for the construction of 4 x LPG ammonia vessels with a capacity of 93,000 cbm.

The price is rumored around \$111 mln each.

In the same agreement apparently there are options for up to 6 x 40,000 cbm LPG ammonia units.

Pacific Gas committed 6 x 61,500 dwt ethylene carriers at Jiangnan Shipyard in China.

Deliveries are expected between early 2027 and 2028.

SECONDHAND SALES

An active week in the dry second hand market.

2 Japanese built Capesize sisterships, the OCEAN CORONA 180,000 dwt 2009 built Koyo and the CAPE FLAMINGO 180,000 dwt 2005 built were reported sold to Chinese Buyers, at \$20.8 mln and \$15.4 mln respectively.

Another Japanese vessel, the SATORI 177,000 dwt 2007 built Mitsui, was rumored sold to Turkish buyers for \$18.5 mln.

Another interesting deal from Japan: the FJM GLORY 61,000 dwt 2019 built DACKS was rumored sold en bloc with the LOWLANDS MIMOSA 63,000 dwt 2018 built Tsuneishi Cebu at rgn \$29 mln each.

It is worth mentioning that at the end of May the sistership GREAT VENTURE 2019 built DACKS was sold at auction at \$30 mln.

In the Handysize segment, the 2012 Dae Sun built RIA 34,000 dwt was reported sold to Greek Buyers at \$14.2 mln while the VALOR SW 29,000 dwt 2008 built Shikoku was rumored sold to Lebanese buyers at \$8.45 mln.

In tanker market, the LR1 NORDIC JOSEPHINE 74,000 dwt 2007 built New Century was rumored sold at \$23 mln to undisclosed buyers.

During the first week of October a Chinese built same aged 76,000 dwt tanker CHEMTRANS AEGEAN 2007 Dalian (now renamed Paloma) was

reported sold at \$22 mln.

In the MR1 segment, the LEON ZEUS 40,000 dwt 2008 built Santeriuil was reported sold at \$21.5 mln to European buyers.

The ELVIRA 37,000 dwt 2010 built Hyundai Mipo was sold to undisclosed buyers at a price of \$23.5 mln - In July the one year younger LEON POSEIDON (renamed ZAPHIRA) 37,000 dwt 2011 built Hyundai Mipo was sold at \$25 mln.

Also worth mentioning is the sale of the modern Chinese built DICTADOR 34,000 dwt 2019 Fujian Mawei sold to undisclosed buyers at a reported price of \$29.2 mln.

COMMODITY NEWS – DRY BULK

Panama canal says will slash booking slots due to drought

The Panama Canal, one of the world's main maritime trade routes, will further reduce daily ship crossings in the coming months due to a severe drought, the authorities managing the canal said late on Monday, increasing shipping costs.

Booking slots will be cut to 25 per day starting Nov. 3 from an already reduced 31 per day, the Panama Canal Authority (ACP) said in a client advisory, and will be gradually reduced further over the next three months to 18 slots from Feb. 1.

China steel association says EU carbon tax a new trade barrier, calls for more talks

The Carbon Border Adjustment Mechanism (CBAM) proposed by the European Union creates a new trade barrier for Chinese exports, China's state-backed steel association said on Friday, calling for more talks with the bloc to address climate issues. The EU approved in April the world's first plan to impose a levy on high-carbon goods imports from 2026, targeting imports of steel, cement, aluminium, fertilisers, electricity, and hydrogen.

Rainfall plays key role in capping Chinese aluminium capacity

Another month, another new record for China's primary aluminium production sector. Output in the world's largest producer of the light metal has increased by an annualised 2.3 million metric tons since March and hit a fresh peak of 42.6 tons in September, according to the International Aluminium Institute. The production surge has refocused minds on the government's capacity cap of 45 million tons, a measure dating back to 2017 which requires new smelting capacity to be offset by closures of older plants.

China's Yunnan begins aluminium production cuts as dry season begins

Chinese aluminium smelters in southwestern Yunnan province started cutting a total of 1.15 million metric tons of capacity this week, to comply with curbs expected to last until April, a smelter manager and two analysts said. The curb, issued by China Southern Power Grid on Oct. 30, asked local producers to cut their production by between 9% and 40% of capacity, according to Li Lin, aluminium director at AZ Consulting.

Asian seaborne thermal coal demand picking up, but prices stay soft: Russell

Demand for seaborne thermal coal in Asia is starting to pick up ahead of peak winter consumption, but prices are still trending weaker as soft European imports force suppliers to shift destinations for their exports. Lower domestic prices in top importer China are also helping keep seaborne prices subdued as suppliers look to remain competitive in the world's largest producer and consumer of the fuel used mainly to generate electricity.

US coal exports to EU jump after Russia sanctions kick in, EIA says

The United States saw a 22% jump in coal exports to Europe, substituting Russian supply in the 12 months after the European Union's sanctions took effect in August 2022, the U.S. Energy Information Administration (EIA) said on Thursday. The increased shipments to Europe were almost exclusively behind a rise of 5.7 million short tons (MMst) in total U.S. coal exports between August 2022 and July 2023 over the same period before the sanctions kicked in, the EIA said.

Erratic weather threatens Brazil's run at another record soy crop

Just months after Brazil harvested its largest-ever corn and soybean crops, concerns are already brewing over the next crop as wild weather patterns are disrupting both northern and southern soybean-production areas. As of a week ago, farmers in the top soy exporter had planted 40% of their 2023-24 crop, slower than a year ago. Leading state Mato Grosso's soy planting reached 70% last week, falling slightly below the historic pace and reversing what had previously been a quicker clip.

India's smaller rice crop paves way for prolonged export curbs

For the first time in eight years, India's rice output is expected to drop this year, raising the prospect that Prime Minister Narendra Modi's government will extend curbs on exports of the grain to keep a lid on food prices ahead of elections. Production in India, the world's largest rice exporter, is under unusually intense focus after New Delhi banned exports of non-basmati white rice in July, sending global prices surging.

China's 2023 soybean imports seen at record 105 mln metric tons on strong Q4 arrivals

China's soybean imports are likely to stay high through the fourth quarter, taking 2023 purchases to an all-time record, but lacklustre demand from loss-making hog farms is seen reducing purchases in early 2024, traders and analysts said. Record Brazilian soybean supplies are expected to dominate China's imports in the last three months of the year, they said, citing better oil and meal quality, reducing demand for U.S. cargoes in the world's biggest market for the oilseed.

COMMODITY NEWS – OIL & GAS

OPEC oil output rises for third month, Reuters survey finds

OPEC oil output has risen for a third straight month in October, a Reuters survey found on Tuesday, led by increases in Nigeria and Angola and despite ongoing cuts by Saudi Arabia and other members of the wider OPEC+ alliance to support the market. The Organization of the Petroleum Exporting Countries has pumped 27.90 million barrels per day (bpd), the survey found, up by 180,000 bpd from September. Production in August had risen for the first time since February.

US crude output reaches monthly record in August at 13.05 million bpd

U.S. field production of crude oil rose to a new monthly record in August at 13.05 million barrels per day, the Energy Information Administration said on Tuesday. Output rose 0.7% in August from the month prior, the data showed. The previous monthly high was in November 2019, when production reached 13.0 million bpd.

Saudi Arabia, Russia to continue additional voluntary oil cuts

Top oil exporters Saudi Arabia and Russia confirmed on Sunday they would continue with their additional voluntary oil output cuts until the end of the year as concerns over demand and economic growth continue to weigh on crude markets. Both countries said their cuts would be reviewed next month to consider extending, deepening or increasing it.

PetroChina aims to resume Venezuelan oil imports after 4-year pause

China's PetroChina is proposing to buy up to 8 million barrels a month of Venezuelan crude from state-run oil company PDVSA, according to

four people familiar with the matter, hoping to resume a trade suspended four years ago by U.S. sanctions. In October, the U.S. Treasury Department temporarily lifted the sanctions, paving the way for Venezuela to resume exporting crude, gas and fuel to its best customers.

China refiners cut oil output as thin margins, quota shortage bite

China's oil refinery utilisation rates are easing from record third-quarter levels as thinning margins and a shortage of export quotas discourage plants from raising output for the rest of 2023, according to traders and industry consultancies. The drop in refining output could reduce crude demand from the world's top importer and cap global oil prices, pushing up China's crude inventories and dampening prices from top supplier Russia

Belgium drafting new fuel quality law targeting exports to Africa

Belgium is set to shut the door on rising exports of low-quality gasoline and diesel to West Africa as it follows the Netherlands in tightening environmental rules, officials have told Reuters. The Amsterdam-Rotterdam-Antwerp (ARA) hub is the world's leading gasoline exporting region, LSEG data shows, and hosts some of Europe's largest oil refineries including plants operated by TotalEnergies and Exxon Mobil.

Chevron struggles to exit Myanmar gas project after nearly two years

Nearly two years after U.S. energy company Chevron condemned violence and human rights abuses in Myanmar and announced it would leave, the company said it still holds assets there, including a portion of an offshore gas field in a venture

with the state energy company. Chevron said in January 2022 it would exit Myanmar and in February 2023 said it had agreed to sell its assets there, including a 41.1% stake in Myanmar's Yadana gas field, to Canada's MTI Energy for an undisclosed price.

US October LNG exports climb to second highest level on record

U.S. liquefied natural gas (LNG) producers ramped up exports in October, to 7.92 million metric tons, according to data provider LSEG, the second-highest monthly level on record. Exports were just shy of the record 8.01 million metric tons in April this year, and were up from 7.12 million metric tons in September, when plant maintenance reduced U.S. production.

Energy giants' LNG trading results reveal diverging regional bets

Energy giants offered a rare glimpse into their liquefied natural gas (LNG) trading strategies in recent days, with Shell's and TotalEnergies' bets on rising Asian demand paying off while BP's bet on a European deficit turned sour. The contrasting outcomes highlight the risky nature of trading divisions, at times notching up spectacular profits as traders quickly exploit price swings and supply and demand disruptions around the world to make money, but at other times losses have been just as spectacular.
